SARIM ALI

SOFTWARE DEVELOPER | MERN DEVELOPER
Bengaluru, India | +91-7457082181 | sarimali8549@gmail.com | Github | LeetCode | LinkedIn

SUMMARY

Full Stack & Software Developer skilled in building scalable web applications using Node.js, React, MongoDB, and LLM technologies including LangChain and LangGraph. Strong DSA background with **1400+ LeetCode** problems solved.

PROJECTS

Airbnb Clone – Full Stack Property Rental Platform (Live Demo)

Node.js, Express, MongoDB, Mongoose, EJS, Cloudinary, Mapbox, Passport.js, Multer

– Developed a full-stack vacation rental platform inspired by Airbnb, featuring property listings, reviews, user authentication, and interactive maps.
– Implemented secure user login & registration using **Passport.js + Passport-Local-Mongoose**, reducing authentication errors and improving session reliability.
– Integrated **Cloudinary** with Multer for multi-image upload, achieving a 60% improvement in image delivery performance via optimized CDN delivery.
– Utilized **Mapbox SDK** to add dynamic geolocation, interactive map markers, and auto-location suggestions for properties.
– Designed reusable EJS templates using **EJS-Mate**, improving code maintainability and reducing template duplication by 40%.
– Built a scalable backend with **Express & MongoDB**, supporting CRUD operations for listings, users, and reviews.
– Added server-side validation with **Joi**, preventing malformed form submissions and reducing user errors by 30%.
– Implemented persistent session storage using **connect-mongo**, improving session stability in production.

Kairon AI – AI-Powered Learning Platform (Live Demo)

React, TypeScript. Tailwind CSS, Google Gemini API, D3.js, Web Speech API

– Designed and built an AI-driven learning platform that transforms static study material into interactive, personalized learning experiences for students and educators.
– Implemented multi-format content ingestion, enabling users to quickly create structured study materials.
– Developed automated summarization, flashcard generation, MCQ quizzes, and personalized study guides using Google Gemini API, improving learning efficiency and retention.
– Built a Spaced Repetition System (SRS) to intelligently schedule flashcard reviews, maximizing long-term memory retention.
– Created a AI Tutor using the Socratic method to promote critical thinking through guided questioning rather than direct answers.
– Implemented semantic search to retrieve conceptually relevant information from user notes beyond simple keyword matching.
– Visualized complex relationships between concepts using interactive D3.js-powered concept maps.

SKILLS

- **Programming Languages**: Java, JavaScript, Python, TypeScript, HTML, CSS
- **Frontend Development**: React.js, Tailwind CSS, Bootstrap, Redux Toolkit
- **Backend Development**: Node.js, Express.js, Flask, RESTful APIs, JWT Authentication
- **Databases**: MongoDB, SQL, Vector
- **Cloud & Backend-as-a-Service**: Firebase, Appwrite, AWS(EC2/S3), Docker, MLflow
- **AI/LLM Tools**: LangChain, LangGraph, LangSmith, RAG(Retrieval-Augmented Generation)
- **Machine Learning & Data Science**: Statistics, NLP(NLTK/Spacy), Deep Learning(ANN, CNN, RNN), Transformers
- **Developer Tools**: Git, GitHub, Cloudinary
- **Core Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

EDUCATION

B.M.S. College Of Engineering — *October 2023 - June 2027*
Bachelor of Engineering - Computer Science and Engineering(Core); ***GPA: 9.54*** — Bengaluru, India

Sunway Senior Secondary School — *April 2021 - June 2022*
Science, Intermediate; ***Percentage: 90%*** — Rampur, India

PUBLICATION

A Conversational **RAG** Assistant - AgentDoc
Built document Q&A chatbot using LangChain and Streamlit.
